linkedin.com/in/okasha-mehmood

Offensive security engineer with 3+ years of specialised experience and 50+ confidential engagements across government-adjacent, telecom, fintech, SaaS, legal, logistics, and identity environments. I test web, API, mobile, and network systems, then work with engineering teams through remediation and retest. Known for clear reporting, careful evidence handling, and findings that become shipped fixes.

AVAILABILITY

Senior roles & select contracts

Remote worldwide. References and redacted reports available under NDA.

SELECTED IMPACT

50+	7	3+	0
CONFIDENTIAL SECURITY ENGAGEMENTS	SECTORS TESTED	YEARS IN OFFENSIVE SECURITY	CLIENT RECORDS RETAINED

EXPERIENCE

Jan 2024 — Present
Islamabad, PK
Current

Penetration Tester · VisionTech 360

- Lead web, API, network, and mobile assessments for enterprise and public-sector clients; scope, test, report, and retest.
- Found and helped close critical cross-tenant authorization, session, upload, and perimeter-exposure paths; built Python/Bash automation to reduce repetitive testing.

Apr 2024 — Dec 2024
Islamabad, PK

OSINT Analyst · VisionTech 360

- Mapped external attack surfaces and shadow IT using Maltego, Shodan, SpiderFoot, and Recon-ng; automated intelligence pipelines for exposed credentials and rogue infrastructure.

Nov 2021 — Present
Remote

Independent Security Consultant · Remote

- Delivered 50+ assessments across fintech, SaaS, legal, logistics, telecom, and government-adjacent clients; produced executive and developer-facing reports with CVSS, reproducible evidence, prioritised remediation, and re-test memos for SOC 2 and ISO 27001 readiness.

Jun 2023 — Mar 2024
Islamabad, PK

Web Penetration Testing Intern · Codesvista

- Performed targeted web and REST API testing with Burp Suite Professional, OWASP ZAP, and Nmap; authored remediation advisories and supported internal research labs.

SELECTED ENGAGEMENTS

Multi-tenant SaaS · cross-tenant BOLA
Proved cross-organization read/write access; enforced tenant scope at the query layer and retested 40+ object routes before a SOC 2 audit.

External perimeter · WAF bypass
Exposed direct-to-origin access and public management planes; reduced observable attack surface by 78% with origin locking, ZTNA, and asset ownership.

National telecom · LFI + SQL injection
Confirmed path traversal and injection in public portals with minimal evidence; drove canonicalisation, parameterised queries, privilege reduction, and segmentation.

Android malware · rogue VPN
Reversed a dropper abusing VpnService, reconstructed the second-stage loader, and delivered YARA, Sigma, and MDM controls for the fleet.

TECHNICAL CAPABILITIES

App & API	BOLA/BFLA, auth/session, SSRF, file upload, deserialization, business logic, GraphQL, OWASP WSTG/API Top 10
Mobile & RE	Android, Jadx, Apktool, Frida, SSL pinning, root detection, crypto protocols, native analysis, MASTG/MASVS
Network & ASM	External footprint, origin exposure, WAF bypass, exposed management planes, segmentation, TLS, ZTNA, OSINT
Tooling & delivery	Burp Suite Pro, Nmap, Masscan, Amass, ffuf, SQLmap, Wireshark, Python, Bash, PowerShell, CVSS, MITRE ATT&CK

EDUCATION & CERTIFICATIONS

- **BSc Computer Science**
  University of Science & Technology · 2023 · GPA 3.3/4.0
- **Cybersecurity Specialist**
  NAVTTC
- **Certified Red Team Analyst (CRTA)**
  CyberWarFare Labs
- **Python for Cybersecurity**
  Cybrary
